## Consulting Services:

---

We provide an array of consulting services to assist you in making your new home, remodel project, residential development, commercial project or building product healthier for people and the planet. A few of our services include:

### MANUFACTURING

- **Green Product Consulting** – Product evaluation and marketing assistance to highlight LEED appropriateness. Includes an in-depth evaluation of the product to determine all possible LEED category contributions.

### NEW CONSTRUCTION & REMODELLING

- **LEED for Homes** – Use our experience to help you plan, execute, and certify a LEED rating for your new home under the U.S. Green Building Council's LEED for Homes Rating System.
- **NAHB** – Educational consulting, project team design meetings, technology research, coordination, verification and documentation for certification of homes under the NAHB's National Green Building Program.
- **LEED NC, CS, CI** – Educational consulting, coordination, technology research, verification and documentation for certification for commercial buildings under the U.S. Green Building Council's LEED NC, CS and CI Rating Systems.
- **Energy Analysis** – A comprehensive review of your new plans or existing conditions. We'll make recommendations to improve energy performance of your home or commercial structure.
- **Water Efficiency Analysis** – An examination of the designed water systems and the selected water fixture specifications. We will recommend various water saving strategies that may be implemented throughout the house and landscaping.
- **Indoor Air Quality Analysis** – A comprehensive review of provided finish specifications will be performed to generate a list of measures that should be considered for improving indoor air quality.
- **Green Cleaning Inventory and Training** – Site visit to the home to assess current cleaning products, educate as to any potential health implications, eco-friendly cleaning alternatives and proper cleaning techniques and schedules.

## Architectural & Interior Design Services:

---

We also provide an array of design services to assist you in developing your new home, remodel project, commercial project, or development healthier for people and the planet. A few of our services include:

### NEW CONSTRUCTION & REMODELLING

- **Residential & Commercial Architecture** – We are a full service architecture firm, focusing on a unique blend of healthy living and energy conservation. Whether you are looking to add a new bedroom, build a multi-story home, or develop an office building, we can provide architectural services to suit your needs. Each design is tailored to fulfill your desires, while creating a finished product that is energy and water efficient, durable, and healthy.
- **Residential & Commercial Interior Design** – We are also full service interior design firm with expertise in eco-friendly and healthy materials and products. Whether you are looking to remodel your bath, kitchen, or retail store, we can provide interior design services to suit your needs. Each design is tailored to fulfill your desires, while creating a finished product that is beautiful and healthy.
- **Color consultation** – One of the simplest and most important pieces of interior design is the selection of colors. We help our clients develop paint color schemes to be used throughout their home or office. We also explain the impact of paint on indoor air quality, and highlight the importance of utilizing non-toxic alternatives.
- **Buyer Services** – We can assist residential or commercial property buyers determine whether or not an existing home, office building, or vacant property is suitable for their needs prior to purchase. We analyze existing conditions, zoning and code restrictions, and the client's program to help them make an educated decision.
